Math for a Fisherman

Mr. Larson owns a fishing boar in Alaska. One day his boat brought back two hundred thirty-five salmon and sixty-seven halibut.

1. How many fish total did Mr. Larson's boat bring back?

2. How many more salmon than halibut?

3. If each salmon weighs ten pounds and each halibut weighs twenty pounds how many pounds of fish did Mr. Larson's boat bring back?

4. If Mr. Larson can sell both types f fish for fifty cents per pound, how much will he receive for his boat's catch?

5. If Mr. Larson paid four hundred twenty-five dollars for gas for his boat, how much of the money he received from selling his fish will he have left?

6. Mr. Larson has three helpers. If he pays each of them one hundred twenty-five dollars how much of the money he got from selling his fish will he have left?
